Subject:

Request to the town of L.B.K. to Re-surface / Apply a Fresh Asphalt Layer on the street at Cutter LANE

From: Linde Ward; 561 Cutter LANE

DATE: Nov. 19, 2026

The street is shabby & dilapidated as evident of the longitudinal cracks & potholes as seen in the photos.

The present condition is a direct result of the water pipe installation. The construction destabilized & weakened the existing road.

There may have been micro cracks prior to the installation,

But now the cracks appear to extend through the full thickness of the asphalt & there are potholes. The street looks terrible.

This situation is only going to get worse Linde Ward
