RE: EN PROVENCE FLOW THRU VENTS

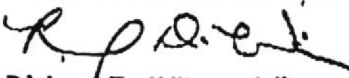

Dear Sandy:

We have reviewed the flow thru requirements for Buildings 1 and 3 at En Provence. It is our professional opinion that flow thru vents are not required in these two buildings because they have been designed with breakaway wall per Florida Department of Environmental Protection requirements. Breakaway construction, by its very nature will provide equalization of hydrostatic and hydrodynamic flood forces on all walls at the lower levels.

The construction is similar to a typical V-Zone structure where hydrostatic relief vents are not required by FEMA.

Please contact us if you have any more questions regarding this issue.

Sincerely
WILSON STRUCTURAL CONSULTANTS, INC.

Richard D. Wilson, P.E.
