1975 TOWN CODE

PREFACE

This volume, as originally published, constituted the first revision and codification of the general ordinances of the Town of Longboat Key, Florida, since 1965. It contained the Charter and such of the ordinances of a general and permanent nature passed on or before March 3, 1971, as were found desirable for retention, except those expressly saved from repeal by the Adopting Ordinance.

The Code, as now supplemented, contains ordinances as indicated on the page of instructions for handling supplemental pages.

The ordinances were codified, edited and indexed by the Editorial Staff of Michie City Publications Company under the supervision of Chas. W. Sublett, Stephen C. Willard and John K. Haley.

The publishers wish to express their appreciation for the cooperation of all the town officials and employees during the preparation of this publication. Particular acknowledgment is due Mr. G. M. Lanier, Town Manager, and Mr. I. W. Whitesell, Jr., Town Attorney, for their assistance during the progress of the work.

A feature to which the attention of the user is directed is the arrangement of the chapters in alphabetical order. Attention is also directed to the analysis preceding each chapter which, in many instances, will serve as an index within itself. The general index, carried at the end of the Code, has been carefully prepared and should serve as an accurate medium for locating the individual sections of law within the Code. In the footnotes appearing throughout the Code will be found references to the Charter and the applicable and related provisions of the state law. These notes also contain cross references to other and related provisions in the Town Code. By reference to the historical citations, appearing at the end of each section, the user will be able to ascertain the ordinance from which the present section has been derived.

It is a recognized fact that if any Code is to accomplish its intended purpose it must be kept up to date by means of an adequate supplemental service. Accordingly, the publishers point out the advisability and necessity of keeping this Code current.

The new Town Code is presented to the officials and citizens of the Town of Longboat Key, Florida, in the belief that it will merit their approval.

1975 TOWN CODE

§ 6-12

BUILDINGS

§ 6-12

Sec. 6-12. Dangerous, unsanitary, etc., buildings or structures.

If any building or structure, or portion thereof, by reason of its use, abandonment or dilapidated condition, becomes a fire hazard, unsanitary or otherwise dangerous to health or human life, the building inspector, immediately upon learning the condition, shall forthwith give the owner, agent or person in control of such building written notice stating the defects thereof. This notice shall require the owner within a stated time either to complete specified repairs or improvements, or to demolish and remove the building or structure, or portion thereof.

(a) If necessary for the preservation of life, safety or health, such notice shall also require the building, structure or portion thereof to be vacated forthwith and not re-occupied until the specified repairs and improvements are completed, inspected and approved by the building inspector. The building inspector shall cause to be posted at each entrance to such building a notice that the building is unsafe and that its use or occupancy has been prohibited. Such notice shall remain posted until the required repairs are made or demolition is completed. It shall be unlawful for any person to remove such notice without written permission of the building inspector, or for any person to enter the building except for the purpose of making the required repairs or of demolishing the building.

(b) The owner, agent or person in control shall have the right to show cause why he should not comply with the requirements imposed by the building inspector. In such case the owner, agent or person in control, within ten (10) days after receipt of the written notice from the building inspector, shall file with the town manager a written notice of appeal, stating why the requirements of the building inspector are unjust or unreasonable. Until a final decision is reached by the town manager, the filing of such notice of appeal shall stay further proceedings or action upon those requirements imposed by the building inspector which relate to repair or demolition; but filing notice of appeal shall not stay requirements relating to the vacating or evacuation of premises in instances where, in the opinion of the building inspector, continued use of the premises would involve imminent danger to health or human life.

(1) The town manager shall set a date for a hearing of the appeal within thirty (30) days from the date the notice

1975 TOWN CODE

§ 6-12

§ 6-12

of appeal is filed. At the hearing the party making the appeal may be represented by agent or attorney, if he so desires.

(2) After consideration of the evidence offered at the hearing, the town manager shall make a written determination whether the requirements of the building inspector were reasonably necessary to safeguard life, limb, property and the public welfare, whether they were just and reasonable and whether they were in accordance with this chapter and its purposes. Pursuant to such determination he shall make an order, either affirming the requirements imposed by the building inspector, or altering, modifying or cancelling the same. In the order the town manager may also impose such conditions as seem advisable.

(3) The order of the town manager shall constitute a final determination of the matter, subject only to such remedy as the aggrieved party may be allowed at law or equity.

(c) In case the owner, agent or person in control cannot be found, or, if such owner, agent or person in control shall fail, neglect or refuse to comply with the provisions of a notice to repair, improve, demolish or remove the building, structure or portion thereof, the building inspector, after having determined the cost shall, with the approval of the town manager cause such building or structure or portion thereof to be demolished, secured or required to remain vacant, as circumstances may require.

(d) Promptly after completion of any corrective, repair or demolition work done by the town under the authority of this chapter, the town manager shall cause the owner to be billed for the cost of such work, including labor, materials, engineering services, title searches and administrative overhead. If the address of the owner is unknown after diligent search and inquiry, it shall not be necessary to send such bill. If such bill is not paid within ten (10) days after mailing, or within seven (7) days after personal delivery, or after ten (10) days after the completion of the work where the address of the owner is unknown after diligent search and inquiry, the town manager shall serve on the owner and each mortgagee, lienholder or other person having an interest in the property involved (but failure to serve a mortgagee, lienholder or other person having an interest, except the owner, shall not affect the validity or amount of any lien or special assessment hereunder), a notice covering substantially the following points:

(1) Describing the premises, stating the nature of the work done thereon, stating the amount for which the town

claims a lien, fixing a date on which the town commission will hold a public hearing on the matter for the purpose of making a special assessment against the property for the cost of the work and advising the interested parties of their right to be heard on any matter pertaining to the proper amount or validity of the proposed special assessment to be made against the property for such lien, at the stated time and place.

(2) Such notice shall be served on the interested parties not less than five (5) days prior to the date set for the hearing by the town commission.

(e) At the hearing referred to in subsection (d) of this section, the town manager shall report to the town commission on the nature of the work accomplished, the cost of the work and the giving of the notices. The town commission shall hear all interested parties with respect to the validity and proper amount of the proposed special assessment to cover such costs, and shall thereupon by resolution levy a special assessment against the property in such amount, if any, as it finds to be proper and equitable. (Ord. No. 157, § 1, 10-1-69)

Sec. 6-13. Civil actions to correct violations of chapter.

In case any building or structure is or is intended to be erected, constructed, reconstructed, altered, repaired, converted or maintained, or any building, structure or land is used, or is intended to be used in violation of this chapter, the attorney for the town, in addition to the remedies provided for in this Code, is hereby authorized to institute any appropriate action or proceeding, in law or equity, to prevent such unlawful erection, construction, reconstruction or to restrain, correct or abate such violation. (Ord. No. 157, § 1, 10-1-69)

Sec. 6-15. Application.

Each applicant for a building permit shall submit an application to the building inspector for his approval before a permit shall be issued. The application shall include:

(a) An accurate plot diagram, in duplicate, which shall be drawn to scale and shall show the size, shape and dimensions of the tract to be built upon, the size and location of any existing structures, the dimensions and planned location of all structures to be built, including alterations to existing structures, as well as parking spaces, loading areas, roads, waterways, easements and any other pertinent superficial features, together with evidence of approval by the state and county health department of water and sewerage systems. The building inspector may require a boundary line survey, if necessary, prepared by a qualified surveyor, in order to assure compliance with the provisions of this chapter or other town ordinances.

Where the outside dimensions of an existing structure will not be affected, or in any other case where a plot diagram is clearly unnecessary, the requirements of this subsection may be waived by the building inspector.

(b) Three (3) or more copies of all specifications and drawings, drawn to scale and in sufficient detail to indicate the nature and character of the work. Such drawings and specifications shall contain information, in the form of notes or otherwise, as to the quality of materials where quality is essential to conformity with the Southern Standard Building Code. The building inspector may also require such other

Nothing contained in this section shall be deemed to relieve or excuse any owner or builder from compliance with the more detailed plat requirements of the town subdivision code or from any other requirements contained in other ordinances now or hereafter enacted.

Where plot plan or development plan approval is required by this or any other ordinance now or hereafter enacted, building permits shall be issued only in conformity with the final plot plan or development plan as approved by the town commission.

All certificates of occupancy shall be applied for coincident with the application for a building permit. Applications for certificates of occupancy shall be made for each stage of construction to be completed in accordance with the approved development plan. (Ord. No. 157, § 1, 10-1-69; Ord. (1) If the construction authorized by such permit is not commenced within sixty (60) days after the date the permit is issued.

(2) If at any time after construction is commenced, the work is suspended or abandoned for a period of thirty (30) days. Construction shall be deemed to have been "commenced" when any work is started on site preparation or building and structures in accordance with approved development or construction plans. Construction shall be deemed to have been "suspended or abandoned" when no substantial work has been accomplished in any thirty-day period.

Variances from the twelve-foot elevation for the lowest floor level may be granted under the following conditions:

(a) Undeveloped property for which a variance is sought shall not exceed one-half (1/2) acre in size and failure to grant a variance would result in undue hardship to the applicant or endanger the safety or welfare of the adjacent property owners through adverse drainage conditions, esthetic incompatibility or different levels of pedestrian traffic;

(b) An application may include more than one building parcel under the same ownership, but each parcel shall be considered separately. An application for variance as to more than one parcel shall be considered divisible and action taken accordingly.

(c) Each application shall be accompanied by a base application fee of ten dollars (\$10.00). In the event more than one parcel is included in a single application, an additional fee of ten dollars (\$10.00) for each parcel in excess of one shall be paid at the time of application.

(d) The town manager shall inspect the parcels for which variance is sought and report his findings and recommendations to the town commission.

(e) The town manager may require a topographic survey which shall indicate sufficient floor elevation data to establish compliance with the provisions of sections 6-22.1 through 6-22.3. Such survey shall be signed and sealed by a person licensed under the laws of the State of Florida to perform such services.

(f) After report and recommendation as hereinafter provided, the application shall be placed on the agenda for the next regular commission meeting, or for a special meeting at the discretion of the mayor. The applicant shall be notified at the time and place of such meeting. Consideration of an application at any such meeting shall be deemed a hearing on such application.

(j) Once granted, a variance shall remain in force for a period of one year, at the expiration of which time, such variance shall lapse if a building permit has not been issued. Lapse of a variance granted hereunder shall not preclude subsequent application. Variances shall pertain to the parcel for which they are sought and shall not be deemed personal to the applicant.

(k) Written notice of granting a variance shall be attached to or made a part of the building permit issued to applicants. (Ord. No. 73-11, § 4, 5-29-73)

- (a) The permittee shall comply with any specific requirements imposed in this case by the town and the division of beaches and shores of the state board of conservation, attached hereto and made a part of this permit and agreement.
- (b) The permittee shall in no way obstruct or impair the use of the beach by the public in the area below the mean high water line, except to a minimum extent determined by the town and by the division of beaches and shores to be unavoidable.
- (c) The rights granted by this permit and agreement shall not be construed as a conveyance of title to or a waiver of rights in the sovereignty land held by the trustees and the state.
- (d) The permittee hereby agrees to hold and save the trustees of the internal improvement fund, the Florida Board of Conservation and the town harmless from any damage to persons or property which might result from the work or activity permitted hereunder.
- (e) The permittee agrees to adjust, alter or remove any structure or other physical evidence of the work or activity permitted hereunder, as directed by the town or the division of beaches and shores of the state department of conservation, if in the opinion of the town or the Florida Board of Conservation the structure, work or activity in question results in damage to surrounding property or otherwise proves to be undesirable or becomes unnecessary. Adjustment, alteration or removal required under this provision shall be accomplished by the permittee at no cost to the state or town. The decision of the town or Florida Board of Conservation as to whether adjustment, alteration or removal is required shall be final, and the town or Florida Board of Conservation shall set reasonable time limits within which adjustment, alteration or removal shall be accomplished.
- (f) This permit and agreement shall be cancelled and the permittee directed to remove the structure or other physical evidence of the work or activity per-

mitted hereunder, at permittee's expense, upon thirty days written notice from the town or division of beaches and shores of the state department of conservation, if the permittee fails to abide by and live up to the provisions, terms and conditions of this permit and agreement.

(g) The permittee agrees to provide the Florida Board of Conservation with an acceptable surety bond in an amount equal to one hundred ten percent of the estimated cost of removal of the coastal construction, but in no case less than five hundred dollars, for such period of time as may be required, to guarantee full compliance by the permittee with the provisions, terms and conditions of this permit and agreement. Requirement for such bond may be waived, discontinued at any time, renewed for successive terms, or kept in force perpetually, at the discretion of the division of beaches and shores.

(h) Upon completion of the work permittee shall notify the building inspector of the town and the building inspector shall make an inspection within a reasonable time and issue a certificate that the construction permitted hereunder was done in accordance with the master plan's plans and specifications. If the construction was not completed according to the master plan, a certificate of completion shall be denied and in such case the permittee agrees to furnish a certification by an engineer that the construction was done in accordance with the plans and specifications approved hereby.

(i) It is expressly understood that this permit and agreement does not relieve the permittee of responsibility for compliance with permit requirements of the U.S. Army Corps of Engineers. (Ord. No. 105, § 6, 7-13-65.)

Sec. 7-7. Same--Approval by Florida Board of Conservation.

Upon action on any application for a permit for coastal construction, the town manager shall forward a copy of the application, together with his recommendations to the state board of conservation. No permit granted by the town shall become effective until the Florida Board of Conservation grants a permit for coastal construction. (Ord. No. 105, § 7, 7-13-65.)

Sec. 7-8. Same--Emergency permit.

The town manager may grant an emergency permit, if emergency exists in the opinion of the town manager, without a formal application therefor after he has obtained the verbal approval of the division of beaches and shores of the Board of Conservation, however, the emergency permit shall be conditioned upon the applicant immediately making an application pursuant to this chapter. employee's pension shall be computed in accordance with this section and in so computing such pension his service up to his normal retirement date and compensation up to his actual retirement date shall be used. In addition, the pension shall reflect an actuarial increase recognizing the years from the employee's normal retirement date to date of actual retirement. (Ord. No. 226, § 5-1, 8-9-72.)

Sec. 15A-13. Early pension.

An employee who meets the requirements for an early pension shall receive a monthly amount determined as follows:

(a) The early pension commencing at the employee's normal retirement date shall be one and one-half percent of the average monthly compensation multiplied by his years of service up to age fifty-five plus two percent of the average monthly compensation multiplied by his years of service from age fifty-five to retirement. Such pension benefits together with the employee's primary social security benefits shall not exceed seventy-five percent of the average monthly compensation.

(b) If payment of an early pension commences prior to the employee's normal retirement date, the monthly amount shall be the pension computed in subsection (a) above, reduced by five-twelfths of one percent for each month between the date payments commence and his normal retirement date. (Ord. No. 226, § 5-2, 8-9-72.)

Sec. 15A-14. Disability pension.

An employee who meets the requirements for a disability pension shall receive a monthly amount which shall be computed in the same manner as an early pension under subsection (a) of section 15A-13 without reduction for early commencement. (Ord. No. 226, § 5-3, 8-9-72.)

Division 3. Optional Benefits.

Sec. 15A-15. Joint and survivor option.

By filing an application with the committee, an employee may designate his spouse (or any dependent approved by the committee) as his contingent pensioner and elect to receive a pension payable in accordance with one of the following options, in lieu of the pension to which he may otherwise become entitled upon retirement:

(a) Option 1: The employee shall receive a reduced pension payable for life, and payments in the amount of one hundred percent of such reduced pension shall, after the employee's death, be continued to the contingent pensioner during the latter's lifetime.

(b) Option 2: The employee shall receive a reduced pension payable for life, and payments in the amount of seventy-five percent of such reduced pension shall, after the employee's death, be continued to the contingent pensioner during the latter's lifetime.

1975 TOWN CODE

§ 15A-15

PENSIONS AND RETIREMENT

§ 15A-17

- (c) Option 3: The employee shall receive a reduced pension payable for life, and payments in the amount of fifty (50) per cent of such reduced pension shall, after the employee's death be continued to the contingent pensioner during the latter's lifetime.

The aggregate of the pension payments expected to be paid to an employee and his contingent pensioner under any of the above options shall be the actuarial equivalent of the pension which the employee is otherwise entitled to receive upon retirement.

An employee may elect to revoke an option prior to retirement by filing such election or revocation in writing with the committee prior to retirement. Under no circumstances may an option be changed or revoked after the employee's retirement.

An election made pursuant to this section shall become inoperative in the event that:

- (1) The employee's death occurs prior to actual retirement; or
- (2) The death of the contingent pensioner occurs before the employee's actual retirement. (Ord. No. 226, § 6-1, 8-9-72)

Sec. 15A-16. Level income option.

If payment of an early pension commences prior to the earliest age as of which the employee will become eligible for an old age insurance benefit under the Social Security Act, the amount of the early pension may be adjusted so that an increased amount will be paid prior to such age and a reduced amount thereafter; the purpose of this adjustment is to enable the employee to receive, from the plan and under the Social Security Act, an aggregate income in approximately a level amount for life. Such adjusted pension payments shall be the actuarial equivalent of the pension otherwise payable to such employee. (Ord. No. 226, § 6-2, 8-9-72)

Sec. 15A-17. Other forms of payment.

The committee may, in its sole discretion, at the request of an employee or contingent pensioner, direct that any benefit provided by the plan be paid in some form other than that expressly set forth in the plan; provided, that payments in

1975 TOWN CODE

such other form shall be the actuarial equivalent of the benefit otherwise payable. The committee shall, if it deems it appropriate, require an employee or contingent pensioner to submit evidence of good health as a condition to receipt of any such other form of payment, particularly any lump sum payment.

If a pension payable under the plan is less than twenty-five dollars (\$25.00) per month, the committee may direct that, in lieu of such pension, the actuarial equivalent thereof shall be paid in a lump sum, or in a series of uniform monthly, quarterly or annual amounts for life or for a designated period of time.

The time during which payment shall be made of any of the other forms of payment provided for in this section shall be limited to a period not exceeding the life or the life expectancy of the employee or contingent pensioner.

Notwithstanding anything herein to the contrary, if the actuarial value of an employee's benefit under any optional benefit is less than fifty (50) per cent of the value of the benefit otherwise payable to the employee, the optional benefit shall be adjusted so that the value of the employee's benefit under the option will be equal to fifty (50) per cent of the value of the benefit otherwise payable to the employee. (Ord. No. 226, § 6-3, 8-9-72)

Division 4. Other Benefits

Sec. 15A-18. Deferred termination benefit.

Upon an employee's termination of employment for any reason other than death or retirement, he shall be entitled to a deferred monthly benefit commencing as of his early or normal retirement date, as defined in sections 15A-9 and 15A-10.

The benefit shall be computed in the same manner as an early pension as defined in section 15A-13, subsection (a), considering compensation and service up to the date of termination, and in accordance with the following vesting percentages:

Sec. 15A-19. Pre-retirement death benefit.

If the death of an employee occurs after his normal retirement date but prior to his retirement, and if the employee would have been entitled to a pension if his retirement had occurred immediately prior to his death, a pension shall be payable, except as provided by section 15A-15 in the event that Option 1, 2 or 3 has been elected, to the employee's beneficiary for sixty (60) months. The amount of such pension shall be equal to the pension which the employee would have received if his retirement had taken place immediately prior to his death.

If a retired employee is receiving a pension under sections 15A-12 to 15A-14 and no option was elected and if his death occurs before he has received payments for sixty months, the employee's beneficiary shall be entitled to a monthly pension for the remainder of the sixty month period, that is, until such time as sixty monthly payments have been made to the employee and his beneficiary. The monthly amount payable to the beneficiary shall be equal to the monthly amount of pension which the employee was receiving prior to his death.

Every employee shall designate the beneficiary who shall receive the benefit, if any, which is payable upon his death under this section. An employee may change or revoke his designation of beneficiary at any time and from time to time. The designation of a beneficiary, and any change or revocation thereof, shall be made in writing on forms approved by the committee. An employee may also designate a contingent beneficiary to receive benefits under this section in the event the primary beneficiary's death occurs before all payments under this section have been made. (m) Conformity with town regulations: Construction of gravity sewers, lift stations and force mains must conform to "Standards for Waste Water Collection System, Town of Longboat Key, dated December 1, 1972." Building, sewer and all inside plumbing shall conform to the Southern Standard Plumbing Code as the same has been adopted and as amended from time to time by the town. All such work must be inspected and approved by the building inspector before any new installations are connected to the existing public sewer system.

(n) Easements: Prior to installation of lines across private property to provide either water or sewer service, utility easements sufficient for the required installation and the maintenance thereof in a form acceptable to the director shall be furnished to the town. (Ord. No. 73-4, § 5, 3-7-73)

Sec. 17B-21. Use of the public sewers.

(a) Unlawful discharges to sanitary service: It shall be unlawful for any person to discharge or cause to be discharged any storm water, surface water, groundwater, roof runoff, subsurface drainage, uncontaminated cooling water or unpolluted industrial process waters into any sanitary sewer.

(d) Wastes containing certain substances: It shall be unlawful for any person to discharge or cause to be discharged the following described substances, materials, waters or wastes if it appears likely in the opinion of the director that such wastes can harm either the sewers, waste water treatment process, or equipment, have an adverse effect on the receiving stream, or can otherwise endanger life, limb, public property or constitute a nuisance. In forming his opinion as to the acceptability of those wastes, the director will give consideration to such factors as the quantities of subject wastes in relation to flows and velocities in the sewers, materials of construction of the sewers, nature of the waste water treatment process, capacity of the waste water treatment plant and other pertinent factors. (6) Any waters or wastes containing phenols or other taste-producing or odor-producing substances in such concentrations exceeding limits which may be established by the director as necessary, after treatment of the composite waste water, to meet the requirements of the state, federal or other public agencies of jurisdiction for such discharge to the receiving waters;

(7) Any radioactive wastes or isotopes of such half-life or concentration as may exceed limits established by the director in compliance with applicable state or federal regulations;

(8) Materials which exert or cause:

(i) Unusual concentrations of inert suspended solids including but not limited to, Fuller's earth, lime slurries and lime residues, or of dissolved solids including, but not limited to, sodium chloride, sodium sulfate, phosphates, nitrates and ammonia;

(ii) Excessive discoloration including, but not limited to, dye wastes and vegetable tanning solutions;

(iii) BOD (above three hundred (300) mg/l), chemical oxygen demand, or chlorine requirement in such quantities as to constitute a significant load on the waste water treatment works;

(10) Waters or wastes containing suspended solids in excess of three hundred (300) mg/l.

(e) Powers of director. If any waters or wastes are discharged or are proposed to be discharged to the public sewers, which waters contain the substances or possess the characteristics enumerated in subsection (d) of this section, and which in the judgment of the director may have a deleterious effect upon the waste water works, processes, equipment or receiving waters, or which otherwise create a hazard to life or constitute a public nuisance, the director may:

(1) Reject the wastes;

(2) Require pretreatment to an acceptable condition for discharge to the public sewers;

(3) Require control over the quantities and rates of discharge; and/or

(4) Require payment to cover the added cost of handling and treating the wastes not covered by existing taxes or sewer charges under the provisions of subsection (j) of this section. If the director permits the pretreatment or equalization of waste flows, the design and installation of the plants and equipment shall be subject to the review and approval of the director and the department of public health, and subject to the requirements of all applicable codes, ordinances and laws.

(f) Interceptors: Grease, oil and sand interceptors shall be provided when, in the opinion of the building inspector they are necessary for the proper handling of liquid wastes containing grease in excessive amounts, or any flammable wastes, sand or other harmful ingredients, except that such interceptors shall not be required for private living quarters or dwelling units. All interceptors shall be of a type and capacity approved by the building inspector and shall be located as to be readily and easily accessible for cleaning and inspection.

(g) Preliminary treatment, flow-equalizing facilities: Where preliminary treatment or flow-equalizing facilities are provided for any waters or wastes, they shall be maintained continuously in satisfactory and effective operation by the owner at his expense.

industrial wastes shall install a suitable control manhole together with such necessary meters and other appurtenances in the building sewer to facilitate observation, sampling and measurement of the wastes. Such manhole, when required, shall be accessibly and safely located and shall be maintained by the owner so as to be safe and accessible at all times.

(i) Measurements, tests, etc.: All measurements, tests and analyses of the characteristics of waters and wastes to which reference is made in this policy shall be determined in accordance with the latest edition of "Standard Methods for the Examination of Water and Wastewater," published by the American Public Health Association, and shall be determined at the control manhole provided or upon suitable samples taken at said control manhole. In the event that no special manhole has been required, the control manhole shall be considered to be the nearest downstream manhole in the public sewer to the point at which the building sewer is connected. Sampling shall be carried out by customarily accepted methods to reflect the effect of constituents upon the waste water works and to determine the existence of hazards to life, limb and property. (The particular analyses involved will determine whether a twenty-four-hour composite of all outfalls of a premise is appropriate or whether a grab sample or samples should be taken. Normally, but not always, BOD and suspended solids analyses are obtained from twenty-four-hour composites of all outfalls, where pH's are determined from periodic grab samples).

(ii) Special arrangements: No statement contained in this section shall be construed as preventing any special agreement or arrangement between the town and any industrial concern whereby an industrial waste of unusual strength or character may be accepted by the town for treatment, subject to payment satisfactory to the town by any such industrial concern. (Ord. No. 73-4, § 6, 3-7-73)

Sec. 17B-22. Protection from damage.

It shall be unlawful for any person to maliciously, willfully or negligently break, damage, destroy, uncover, deface or tamper with any structure, appurtenance or equipment which is a part of the waste water works. This provision, however, shall not be construed to prevent persons authorized by the town or the director to perform maintenance and repairs in connection with the waste water works. (Ord. The director, building inspector or their representatives shall have no authority to inquire into any processes including metallurgical, chemical, oil, refining, ceramic, paper or other industries beyond that point having a direct bearing on the kind and source of discharge to the sewers or waterways or facilities for waste treatment.

(b) While performing the necessary work on private properties referred to in subsection (a) of this section, the director, building inspector and other authorized employees of the town shall observe all safety rules applicable to the premises established by the owners of such private properties.

(c) The director and other duly authorized employees of the town bearing proper credentials and identification shall be permitted to enter all private properties through which the town has an easement for the purposes of, but not limited to, inspection, observation, measurement, sampling, repair and maintenance of any portion of the waste water works lying within said easement. All entry and subsequent work, if any, on said easement shall be done in full accordance with the terms of the easement to the private property involved.

(d) All persons engaged in the moving or demolition of buildings shall, prior to such movement or demolition, first locate the sewer lateral at the property line and obtain a permit from the town to cap such sewer. Sec. 17B-38. Same---Refund of portion thereof under certain circumstances.

Any person who has paid or who hereafter pays the town a waste water connection fee shall be entitled to a refund of one-half the waste water connection fee paid by such person for each unit (as said term is defined in section 17B-35 of this chapter) which is eliminated from the construction permit within one year from the date of its issuance; provided, however, that in no event shall any person be entitled to any refund whatsoever if the town has expended, contracted to expend or otherwise become obligated to pay any money for constructing or furnishing waste water services to the property described in said construction permit. All original drawings of constructed water distribution systems shall remain the property of the Town of Longboat Key and the information they contain shall be available for planning for future construction.

(C) Design criteria: The following design criteria shall govern all public water distribution systems. A "public water distribution system" is defined as a system which can serve twenty-five (25) or more persons. Mains shall be generally located along streets and drives for ready access.

(1) Pipe size: The minimum size of pipe shall be six (6) inches in diameter, except that smaller sizes may be allowed under special circumstances, provided the future extensions and looping will not be jeopardized. The standard grading schedule of the American Insurance Association and related agencies shall be followed in determining larger sizes.

Supply mains not intended to carry fire flows shall not be connected to fire hydrants.

(2) Materials: Pipe shall be cast iron or ductile iron manufactured in conformance with the latest standards of the American Water Works Association, except that for any sizes under six (6) inches which may be allowed, PVC will be permitted.

Joints shall be push-on or mechanical joints manufactured in conformance with the latest standards of the American Water Works Association. Iron pipe shall be suitably protected against corrosion with polyethylene wrapping or other approved methods.

Cross reference---Utility easements required, § 17B-20(m).

(D) System design: All public water distribution systems must make provision for fire protection in accordance with the standard grading schedule of the American Insurance Association and related agencies hereby adopted by reference

Each building must be connected individually to the water main, complete with meter.

The Town of Longboat Key reserves the right to specify materials, methods of construction and locations of facilities when, in their judgment, it will provide for improved long-range operation of the system. The town reserves the right to revise the foregoing provisions or to supplement them by the adoption of standard plans and specifications.

(E) Review procedures: The town engineer shall review the design engineer's plans and specifications not only as to the foregoing provisions, but also for conformance to established good practices for water system design, which shall include provisions for inspections and test requirements.

(F) Inspection: The town shall provide an inspector, full-time or part-time as deemed appropriate by the town, unless the town waives this requirement in favor of other appropriate inspection. The cost of the town's inspector, as determined by the town, shall be borne by the contractor. (Ord. No. 73-8, § 1, 5-2-73)

If the approval of the preliminary plat expires, said preliminary plat is null and void and the subdivider shall reapply according to the provisions and requirements of this ordinance if he desires to reobtain preliminary plat approval.

(2) The bond or surety shall be in the penal sum of one hundred and twenty-five per cent (125%) of the estimated cost of construction. (2) The bond or surety shall be in the penal sum of twenty-five per cent (25%) of the cost of said improvements as determined by a registered engineer and approved by the town; provided however that the town commission, upon request, may reduce the said amount.

5.44 Town commission action: Whenever a final plat has been submitted to the town commission and is in conformance with the approved preliminary plat and the provisions of these regulations, the town commission shall consider and take action on the plat.

§ 7.10

SUBDIVISION REGULATIONS

§ 7.40

ARTICLE 7. DESIGN STANDARDS

7.10 Suitability of the land.

7.11 Limitation on platting for public purpose: Land unduly subject to rainstorm or tidal flooding, improper drainage, and erosion, as determined by the town, and any land deemed by the town to be unsuitable for development shall not be platted for any uses as may continue such conditions or increase danger to health, safety, life or property, unless steps satisfactory to the town are taken to eliminate the above mentioned hazards, especially as they relate to the construction of buildings thereon.

7.20 Access.

7.21 Legal access required: Every subdivision and every lot within it shall have legal access to a public street or private street constructed in accordance with these regulations.

7.22 Access to adjoining properties guaranteed: A subdivision shall be designed so as to provide for street access to adjoining parcels of land when appropriate. No subdivision shall be approved unless its improved street system is connected to a public street or highway.

7.30 Conformance to the comprehensive plan.

7.31 Conformance to comprehensive plan: All proposed subdivisions shall conform to the comprehensive plan and development policies in effect at the time of submission.

7.32 Refusal to approve plat for public purposes: Whenever the plat proposes the dedication of land to public use and the appropriate agency finds that such land is not required or suitable for public use, the town may either refuse to approve said plat or it may require the rearrangement of lots to include such land.

7.40 Zoning and other ordinances.

7.41 Conflict with other regulations: Whenever there is a discrepancy between minimum standards or dimensions noted herein and those contained in the zoning ordinance, building

1975 TOWN CODE

§ 7.40

LONGBOAT KEY TOWN CODE

§ 7.60

code, or other official regulations or resolutions, the most restrictive shall apply unless an application for change is initiated by the subdivider. If uses are proposed that do not conform to the zoning ordinance, the zoning of the platted area proposed for platting must be changed to conform before the plat is filed.

7.50 Blocks.

7.51 The lengths, widths, and shapes of blocks shall be determined with due regard to:

- a. Provision of adequate building sites suitable to the special needs of the type of use contemplated.
- b. Zoning requirements as to lot sizes and dimensions unless a planned unit development is contemplated.
- c. Needs for convenient access, circulation, control and safety of vehicular and pedestrian traffic.
- d. Limitations and opportunities of topography and other natural features.

7.52 In general, residential blocks should not be greater than fourteen hundred (1,400) feet in length, depending on land configuration.

7.53 Residential blocks shall be wide enough to provide two (2) tiers of lots, except where fronting on major thoroughfares or prevented by physiographical conditions, size or configuration of property, in which case the town may require and/or approve a single tier of lots of minimum depth.

7.60 Lots.

7.61 Insofar as practicable, side lot lines shall be perpendicular or radial to street lines. Each lot shall abut upon a dedicated public or private street.

7.62 Every residential lot shall conform to at least the minimum dimension and area requirement of the zoning code.

7.63 Double frontage, unless required by the town, shall be prohibited except where essential to provide separation of residential development from traffic arteries or to overcome

1975 TOWN CODE

§ 7.60

SUBDIVISION REGULATIONS

§ 7.70

specific disadvantages of topography, orientation, and property size. A planting screen reservation of at least ten (10) feet in width and across which there shall be no right of access, may be required along the line of lots abutting such a traffic artery or other disadvantageous use. Such reservation shall be in addition to other setback requirements.

7.64 Corner lots shall have an extra width at least fifteen per cent (15%) greater than the required minimum to permit appropriate building setback from and orientation to both streets.

7.65 Lot remnants (lots below minimum area or width left over after subdividing tracts of land) shall be prohibited. Such remnant areas shall be added to adjacent lots, rather than remain as unusable parcels.

7.66 The subdividing of the land shall be such as to provide each lot with direct abutting access to an existing public street or to a street contained within the proposed subdivision provided however that individual lots, except in unusual circumstances, shall not front on an arterial street as defined herein.

7.70 Streets.

The arrangements, character, extent, width, and location of all streets shall conform to the comprehensive plan for the town and shall be considered in their relation to existing and planned streets, to topographical conditions, to public convenience and safety, and in their appropriate relation to the proposed uses of the land to be served by such streets.

7.71 Streets not on comprehensive plan: Where such is not shown in the comprehensive plan for the town, the arrangement of streets in a subdivision shall either:

a. Provide for the continuation or appropriate projection of existing streets in surrounding areas at the same or greater width, but in no case less than the required minimum width.

b. Conform to a plan for an area approved by the town to meet a particular situation where natural or other conditions made continuance or conformance to existing streets impracticable.

1975 TOWN CODE

§ 7.70

LONGBOAT KEY TOWN CODE

§ 7.70

7.72 Minor or local streets: Minor or local streets shall be so laid out that their use by through traffic will be discouraged.

7.73 Dead-end streets: Cul-de-sacs shall be required for dead-end streets.

7.74 Special requirements along certain major streets: Where a subdivision abuts or contains an existing or proposed major street, the town may require marginal access streets, double frontage lots with screen planting contained in a nonaccess reservation along the rear property lines, deep lots with rear service drives, or such other treatment as may be necessary for adequate protection of residential properties and to afford separation of through and local traffic.

7.75 Street intersections: Street intersections shall be as nearly at right angles as possible, and no intersection shall be at an angle less than sixty (60) degrees. Detailed designs of intersections may be required. Street jogs with centerline off sets of less than one hundred twenty-five (125) feet shall not be permitted unless the town determines their necessity.

7.76 Curb line radius: Curb line radius at street intersections shall be at least thirty (30) feet and where the angle of street intersection is less than ninety (90) degrees, the town may require a greater radius.

7.77 Cul-de-sac streets: Cul-de-sac streets shall be designed with a circular turnaround to have a minimum right-of-way radius of fifty (50) feet and a minimum pavement radius of thirty-five (35) feet.

7.78 Right-of-way and pavement widths: All streets, public or private, shall have a right-of-way width of at least fifty (50) feet and a pavement width of twenty-two (22) feet. The following minimum right-of-way and pavement widths shall apply to the following classifications of streets as defined. Pavement shall generally be centered within the right-of-way.

a. Highways	100 feet	48 feet total, divided or undivided

d. Minor or local	60 feet, unless 50 feet per- mitted	22 feet
e. Marginal access streets	50 feet	22 feet

7.79 Alleys or service drives: Alleys or service drives shall not be provided in residential blocks except where the subdivider produces evidence satisfactory to the town of the need of alleys or service drives. Where alleys or service drives are permitted, minimum right-of-way width shall be thirty (30) feet and improvements shall meet the construction specifications of the town.

7.80 Street prohibitions.

7.81 Half streets: Half streets shall be prohibited. Streets on the boundary of a subdivision shall be of full width.

7.82 Reserve strips: Reserve strips controlling access to streets, alleys, or public grounds shall not be permitted, except where approved by the town as dedicated public land or a controlled-access strip.

7.90 Street names.

7.91 Street names: Street names shall be designated by the subdivider for all streets.

a. No two (2) streets shall have the same name, nor shall any new street have the same name as an existing street in the town.

ARTICLE 8. REQUIRED IMPROVEMENTS

8.10 Minimum improvements.

Every subdivider, at his own expense, shall install or have made provisions for installations acceptable to the town, and in accordance with the provisions herein, certain improvements as hereinafter specified.

8.20 Construction plans and specifications.

The plans and specifications for the required improvements described in these subdivision regulations shall be prepared by a registered engineer and shall be clear and complete in all respects, at an appropriate scale, and shall conform to good engineering practices where not specifically detailed in these regulations or in other town ordinances or regulations or by county or state regulations, said practices being oriented to the special condition of the town. Allowance shall be made for the gulf setback requirements established by the town.

The registered engineer or engineers responsible for the approved plans shall supervise the construction of the improvements and shall provide certified "as-built" plans to the town upon completion.

8.30 Elevation and land filling.

Filling, dredging, or clearing of land, or otherwise changing the character of the site shall not be permitted until after construction plans have been approved and all local, county, regional, state and federal provisions, requirements or permits have been obtained.

Elevations of filled land shall be determined in conformance with all town regulations and other applicable provisions, with due allowance for the required elevation of buildings to be erected thereupon.

All streets shall be laid out and designed in accordance with section 7.70 of this ordinance and other applicable ordinances and regulations of the town.

8.41 Construction standards: All streets, public or private, shall be constructed to the standards of the town and consist of a properly prepared subgrade, an approved road base, and an approved wearing surface. All construction shall be in accordance with the approved plans and specifications but in all cases conform to the town's street construction specifications as adopted and amended from time to time by the town and on file in the office of the town clerk. Any and all tests required by the town shall be at the cost of the subdivider and conducted by an engineering laboratory acceptable to the town.

8.42 Curbs: When curbs are provided at the option of the town, they shall conform to the street construction specifications of the town.

8.43 Sidewalks and bike paths: At the discretion of the town and dependent upon potential pedestrian and/or bicycle traffic, the town may require either sidewalks, bicycle paths or both. Consideration will be given to a pedestrian and bike circulation system with an alignment that may reduce or eliminate roadside sidewalks and bike paths. If sidewalks or bicycle paths are provided, they shall conform to the street construction specifications of the town.

8.44 Signs: All streets shall be provided with street name signs and the necessary traffic-control and regulation signs as determined by the town. All signs shall conform to the street construction specifications of the town.

8.50 Drainage.

A complete storm drainage system shall be constructed which provides for proper drainage of all areas including lots, tracts, streets and other areas. Drainage runoff from areas outside the subdivision which passes over or through areas of the subdivision shall be allowed for in the drainage system design. The storm drainage system shall, in addition to meeting all town requirements, conform with all applicable county and state agency standards and requirements, including

those relating to pollution control. Concentrated point discharge directly to the Gulf shall be prohibited.

8.51 Design: All drainage systems shall be designed for floods resulting from rainstorms of ten-year intervals, applying the "rational formula" or other acceptable methods commonly employed for drainage work in hydraulic calculations. Rainfall intensity data shall be taken from established references. Ultimate land uses shall be assumed for selection of the proper runoff coefficient whether within the subdivision or not. Weighted runoff coefficients may be applied where different coefficients apply within the area comprising drainage basins.

The design shall incorporate infiltration features where a positive, permanent outlet is not available or where percolation may be necessary for pollution control. Percolation testing under the control of a registered engineer may be required by the town to support the computations submitted for approval.

8.52 Construction: The drainage system including all drainage structures and appurtenances such as pipes, inlets, culverts, headwalls or weirs shall be constructed in accordance with the storm drainage construction specifications as adopted and amended from time to time by the town and on file in the office of the town clerk.

§ 7.40

(5) The relationship, beneficial or adverse, of the proposed planned unit development to the neighborhood in which it is proposed to be established.

(6) In the case of a plan which proposes development over a period of years, the sufficiency of the terms and conditions intended to protect the interest of the public and of the residents and owners of the planned unit development in the integrity of the plan.

In the event an outline development plan is granted approval, with or without conditions, the town commission shall set forth in the written resolution the time within which an application for final approval of the plan shall be filed or, in the case of a plan which provides for development over a period of years the periods of time within which applications for final approval of each part thereof shall be filed. The time so established by the town commission between approval of an outline development plan and an application for final approval shall not be less than three (3) months and, in the case of developments over a period of years, the time between applications for final approval of each part of a plan shall be not less than six (6) months; provided nothing herein contained shall be construed to limit an applicant from the presentation of any application for final approval earlier than the time period hereinabove set forth.

7.44 Status of plan after outline development plan approval. Within seven (7) days after the adoption of the written resolution provided for in section 7.43, it shall be certified by the town clerk and shall be filed in his office, and a certified copy shall be mailed to the applicant. Where approval of an outline development plan has been granted, the same shall be noted on the zoning map maintained in the office of the town clerk. An outline development plan upon approval and acceptance, as provided herein, is defined as running with the land provided however that an applicant may apply for a revision to said outline development plan in accordance with the procedures for an original submission, review and approval. Approval of an outline development plan shall not qualify a plat of the planned unit development for recording purposes or authorize development or the issuance of any building permits. An outline development plan which has been given approval as submitted, or which has been given approval with conditions which have been accepted by the applicant (and provided that the applicant has not defaulted nor violated any of the conditions of the approval), shall not be modified, revoked or otherwise impaired by action of the town pending an application or

1975 TOWN CODE

§ 7.40

LONGBOAT KEY TOWN CODE

§ 7.40

applications for final approval, without the consent of the applicant, provided an application for final approval is filed or, in the case of development over a period of years, provided applications are filed, within the periods of time specified in the resolution granting approval of the outline development plan.

Approval of an outline development plan, with or without special conditions shall represent the zoning of that area contained within the plan and shall apply to the land in a manner consistent with zoning unaffected by the sale or transfer of ownership of the land.

7.45 Application for final approval. An application for final approval may be for all the land included in a plan, or to the extent set forth in the outline development plan approval, for a section thereof. The application shall include such drawings, specifications, covenants, easements, conditions and form of performance and maintenance bonds as were set forth by written resolution of the town commission at the time of approval of the outline development plan.

The submission, review and approval of an application for final approval shall be subject to the procedures and provisions of a site plan review as set forth within section 6.70 of this ordinance.

A plan submitted for final approval of a portion of an outline development plan shall be deemed to be in substantial compliance with the outline development plan previously given approval provided any modification by the applicant does not change the density, open space or other provisions of the total planned unit development and any portion thereof does not:

(a) Vary the proposed residential density or intensity of use by more than ten (10) per cent;

(b) Involve a reduction of the area set aside for common open space nor the substantial relocation of such area;

(c) Increase by more than ten (10) per cent of the floor area proposed for nonresidential use; nor

(d) Increase by more than five (5) per cent the total ground areas covered by buildings nor involve a substantial change in the height of buildings.

1975 TOWN CODE

§ 7.40

ZONING

§ 7.50

The procedure for reviewing an outline development plan shall not be held on an application for final approval of a plan when said plan as submitted for final approval is in substantial compliance with the outline development plan. The burden shall nevertheless be upon the applicant to show the town commission good cause for any variation between the plan as submitted for final approval and the outline development plan. If said application, for final approval, is in substantial compliance with the outline development plan the town shall not unreasonably withhold their approval provided that the provisions of section 6.70 are complied with.

7.46 Status of plan after final approval. A plan or any part thereof which has been given final approval by the town commission shall be so certified without delay by the town clerk and a record plat may be filed on record forthwith in the office of the appropriate county clerk in accordance with the state plat law or other applicable state statutes and Appendix A of the Town Code before any development whatsoever shall take place in accordance therewith. Upon the filing on record of the plan all other ordinances and subdivision regulations otherwise applicable to the land included in the plan shall cease to apply thereto. Pending completion within five (5) years of said planned unit development or of that part thereof, as the case may be, that has been finally approved, no modification of the provisions of said plan, or part thereof, as finally approved, shall be made nor shall it be impaired by act of the town, except with the consent of the applicant or his successors.

In the event that a plan, or a section thereof, is given final approval and thereafter the applicant shall abandon said plan or the section thereof that has been finally approved, and shall so notify the town commission in writing; or, in the event the applicant shall fail to commence the planned unit development within twelve (12) months such final approval shall terminate and be deemed null and void unless such time period is extended by the town upon written request of the applicant.

7.50 Regulations governing planned unit developments.

1975 TOWN CODE

§ 8.10

LONGBOAT KEY TOWN CODE

§ 8.20

8.12 Appointment: The board of adjustment shall consist of seven (7) residents who shall be appointed by the mayor and confirmed by the town commission. No member of the board of adjustment shall be a paid or elected official or employee of the town.

Such appointments to fill vacancies shall be made in the same manner as the original appointment and shall be made within thirty (30) days after the vacancy occurs.

8.20 Procedure.

8.21 Rules and regulations: The board of adjustment shall establish rules and regulations for its own operation not inconsistent with the provisions of applicable state statutes or of this ordinance.

8.22 Officers: The board of adjustment shall have a chairman and vice-chairman appointed by the mayor and confirmed by the town commission. The chairman shall be the presiding member of the board and the vice-chairman shall be the presiding members in the chairman's absence or disqualification. 8.23 Meetings and quorum: The board of adjustment shall meet at the call of the chairman, at the written request of three (3) or more regular members or within thirty (30) days after receipt of a matter to be acted upon by the board. Four (4) members of the board shall constitute a quorum.

1978 TOWN CODE

§ 8.20

ZONING

§ 8.30

determinations shall be made, which record shall be a public record on file in the office of the town clerk.

8.24 Decisions: The concurring vote of four (4) members of the board shall be necessary to reverse any order, requirement, decision or determination of the building and zoning official or to decide in favor of the appellant in respect to any matter upon which it is required to pass under the terms of this ordinance or to effect any variations of this ordinance.

The board of adjustment, however, shall render a decision regarding any matter only when in the opinion of the town attorney the matter under consideration is within the jurisdiction of the board as set forth in this ordinance.

8.30 Powers and duties.

The board of adjustment shall have the following powers and duties:

1. To hear and decide appeals where it is alleged there is error in any order, requirement, decision, or determination made by an administrative official in the enforcement of this ordinance.

2. To hear and decide special exceptions to the terms of this ordinance upon which the board is required to pass as required herein.

3. To authorize upon appeal in specific cases such variance from the terms of this ordinance as will not be contrary to the public interest, where, owing to special conditions, a literal enforcement of the provisions of this ordinance will result in unnecessary hardship. As used in this ordinance a variance can be authorized only for legal yard and bulk requirements.

8.31 Appeals: Appeals to the board of adjustment may be taken by any person aggrieved or by any officer, board or commission of the Town of Longboat Key affected by any decision of the administrative official under any provision of this ordinance.

1. **Staying of work on premises:** An appeal to the board of adjustment stays all work on the premises and all proceedings in furtherance of the action appealed for, unless the official from whom the appeal was taken shall certify to

1975 TOWN CODE

§ 8.30

LONGBOAT KEY TOWN CODE

§ 8.30

the board of adjustment, by reason of facts stated in the certificate, a stay would cause imminent peril to life or property. In such case, proceedings or work shall not be stayed except by a restraining order which may be granted by the board of adjustment or a court of record on application, on notice to the officer from whom the appeal is taken and on due cause shown.

2. Procedure: Any person appealing any decision of an administrative official shall make such appeal within thirty (30) days after rendition of the order, requirement, decision or determination appealed from in writing to the board of adjustment and file the same, and ten (10) copies thereof, with supporting facts and data with the building and zoning official. This does not, however, restrict the filing of a request for a special exception or variance by any person at any time as provided for elsewhere in this article.

Upon receipt of said appeal, the building and zoning official shall forthwith examine such appeal or request application and endorse his recommendation thereon together with all documents, plans, papers or other materials constituting the record upon which the action appealed was taken and transmit same to the board of adjustment.

Concurrently, the building and zoning official shall transmit a copy of said appeal together with all documents, plans, papers or other materials constituting the record to the town attorney for his review and opinion. The town attorney shall present his opinion to the board of adjustment with respect to two (2) items as follows:

a. As to whether the appeal is in fact an appeal and within the jurisdiction of the board of adjustment and;

b. The merits of the appeal proper if requested by the board.

3. Hearing of appeal: Before rendering a decision upon an appeal, the board of adjustment shall hold a public hearing. The board shall fix a reasonable time of day for the hearing, give public notice thereof, as well as due notice to the parties according to the provisions of the town charter and this ordinance. Upon the hearing, any party may appear in person or by agent or by attorney.

8.32 Special exception uses: The board of adjustment shall hear and decide applications for special exceptions;

1975 TOWN CODE

§ 8.30

ZONING

§ 8.30

decide such questions as are involved in determining when special exceptions should be granted or denied; and grant special exceptions with appropriate conditions and safeguards or to deny special exceptions when not in harmony with the purpose and intent of this ordinance.

In granting any special exception, the board of adjustment shall find that such grant will not adversely affect the public interest.

Such decision shall be reached only after receipt of a written report from the planning and zoning board and the holding of a public hearing conducted in the manner set forth in section 8.31(3). Failure of the planning and zoning board to submit a written report within thirty (30) days after a referral from the board of adjustment shall be deemed as an approval of the application by the planning and zoning board.

In granting any special exception, the board of adjustment, in addition to the standards enumerated in section 6.10 of this ordinance, may prescribe appropriate conditions and safeguards in conformity with this ordinance. Violation of such conditions and safeguards, when made a part of the terms under which the special exception is granted, shall be deemed a violation of this ordinance. The board of adjustment may prescribe a reasonable time limit within which the action for which the special exception is required shall be begun or completed or both.

8.33 Variances: The board of adjustment shall authorize upon appeal such variance from the terms of this ordinance as will not be contrary to the public interest and as set forth in section 8.30, where, owing to special conditions, a literal enforcement of the provisions of this ordinance will result in unnecessary and undue hardship. In order to authorize any variance from the terms of this ordinance, the board of adjustment must and shall find:

1. That the variance is in fact a variance as set forth within this ordinance and within the jurisdiction of the board based upon the opinion of the town attorney;
2. That special conditions and circumstances exist which are peculiar to the land, structure or building involved and which are not applicable to other lands, structures or buildings in the same zoning district;
3. That the special conditions and circumstances do not result from the actions of the applicant;

1975 TOWN CODE

§ 8.30

LONGBOAT KEY TOWN CODE

§ 8.30

4. That granting the variance requested will not confer on the applicant any special privilege that is denied by this ordinance to other lands, buildings or structures in the same zoning district;

5. That literal interpretation of the provisions of this ordinance would deprive the applicant of rights commonly enjoyed by other properties in the same zoning district under the terms of this ordinance and would work unnecessary and undue hardship on the applicant;

6. That the variance granted is the minimum variance that will make possible the reasonable use of the land, building or structure;

7. That the grant of the variance will be in harmony with the general intent and purpose of this ordinance, and that such variance will not be injurious to the area involved or otherwise detrimental to the public welfare.

In granting any variance, the board of adjustment may prescribe appropriate conditions and safeguards in conformity with this ordinance. Violation of such conditions and safeguards, when made a part of the terms under which the variance is granted, shall be deemed a violation of this ordinance. The board of adjustment may prescribe a reasonable time limit within which the action for which the variance is required shall be begun or completed or both. Under no circumstances except as permitted above shall the board of adjustment grant a variance to permit a use not generally or by special exception permitted in the zoning district involved or any use expressly or by implication prohibited by the terms of this ordinance in the zoning district. No nonconforming use of neighboring lands, structures or buildings in the same zoning district and no permitted use of lands, structures or buildings in other zoning districts shall be considered grounds for the authorization of a variance.

8.34 Judicial remedy by circuit court: Any person or persons, jointly or severally, aggrieved by any decision of the board of adjustment or any officer, department, board or commission of the town, may apply to the circuit court in the judicial circuit where the board of adjustment is located for judicial relief within thirty (30) days after rendition of the decision by the board of adjustment.

The building and zoning official will then either issue or refuse the building permit or refer the application to the town commission or board of adjustment.
